

Is it worth the effort? Of course it is. Made personally for You. Made together with You. And this makes a huge emotional difference You will always feel.

Customizing - how to start

One possible way (if You want to be the creative force behind the customizing process):

You check the options below and decide on all/most of the details Yourself. Don't worry: we will of course check Your configuration and if we find problematic details we will fix them together.

Another possible way (if You are not sure about details and want to have some coaching):

You choose at least....

- 1) a table design (e.g. dining table MADRID, extendible for 8 persons)
- 2) a base veneer (e.g. european walnut)
- 3) the decoration if required (e.g. MATRIX No.2 in bicolor)
- 4) a basic line of color for the residual details
 - e.g. You want a bright table
 - e.g. dominant color of the details should be red (or pink, light brown etc.)
 - e.g. one of the inlay materials (or the primary inlay material) should be rosewood
 - e.g. You want highly contrasting details (or not)

This should roughly be enough to start with. We will complete Your configuration, then discuss and refine it until You are fully happy with it.

The following basic customizing options are included in the base prices:

Table model:	<ul style="list-style-type: none"> ▫ free choice of any standard table model (see TABLE DESIGNS@) with the exception of table design BERLIN
